

FLEA TREATMENTS: We recommend repeating a flea treatment in seven to ten days for best results. Whenever treating a pet for fleas we recommend that the pet owner treat the home, yard and car at the same time to ensure successful eradication. If your pet is on an oral or topical flea treatment, please inform us at grooming check-in.

NAIL TRIMMING & GRINDING: Nails are trimmed each time your pet is groomed at Kennelwood®. However, these services can be performed between regular grooming appointments to keep nails smooth and at the proper length. No appointment is necessary.

PERSONALIZED PLAYTIME & DOGGIE

DAYCAMP: If your pet is spending the day at Kennelwood Village® for grooming, enroll him or her in a Personalized PlayTime session or Doggie DayCamp for the afternoon. Your pet will just love all the fun!

AND MOST IMPORTANTLY: All services explained in this brochure are available for your pet to ensure he or she will live a long, happy and healthy life. We believe regular grooming enhances your pet's well-being and over all good health. Please tell us if there is a service we currently do not offer that you would like to see available.

If you ever have a question or feel that something has been overlooked, please tell us! We take great pride in the quality of our services and truly understand that our success depends upon your satisfaction as a customer. If we ever fall short of your expectations, we want to know about it. Thank you.

Welcome to Kennelwood Village® Pet Grooming Spa

Your pet will thoroughly enjoy the treatments and services while at Kennelwood Village® Styling Salons. Our credo is “**Trust, Commitment, Loving Care**” and we believe your pet’s health and comfort is our number one priority while visiting us. We will handle all of your pet’s needs from teeth to nails. Our customer service representatives will be happy to answer any questions you may have.

WHAT A GROOMING INCLUDES: Every pet has his or her nails cut, pads trimmed, ears cleaned, bathed with the HydroSurge® Power Bathing System, blown dry, given a dental check-up, and a bandanna or beautiful bow for a finishing touch. When your pet is styled, the hair on the body is trimmed. During their grooming visit, your pet will be given water and taken outside for potty breaks.

HYDROSURGE® PET BATHING SYSTEM: The HydroSurge® System gives your pet an invigorating massage while providing the most thorough cleaning process available. HydroSurge® will also enhance the application of medicated shampoos, flea dips or other coat and skin conditioning treatments.

SHED-X® TREATMENTS: If you would like to virtually eliminate pet hair in your home you definitely want to try our trademarked SHED-X® Treatments. During the treatment, we remove dead hair and dander from your pet at our state-of-the-art facility. This hair and dander would have been shed

in your home over the coming weeks. SHED-X® Treatments do not stop the natural shedding process, nor is this treatment a one-time cure. These treatments are most effective when pets are kept on a regular maintenance schedule. A few SHED-X® Treatments benefits include:

- A cleaner, healthier skin and coat for your pet
- A fresher, cleaner smelling pet
- SHED-X® Treatments remove hair and dander, a major source of irritation for allergy sufferers
- A cleaner home with less vacuuming

SHED-X® MINI-TREATMENTS: Mini-treatments should be scheduled between full treatments to reduce the shedding process even more. Frequency of treatments is based upon factors such as your pet’s coat type, shedding cycle and your own personal tolerance for pet hair in the home.

HEALTHY SKIN & COAT TREATMENT: Your pet’s skin is especially susceptible to moisture loss in hot weather, or in low humidity associated with indoor heating during the winter months. This hydrating treatment contains patented formulas which help prevent water loss and maintain a normal water balance in the skin. It’s also great for pets who have dry and itchy skin due to allergies during the year. Just try it! It will immediately improve the feel and appearance of your pet’s coat, and they will be more comfortable when their skin is moisturized.

TEETH BRUSHING: Regular teeth brushing is recommended at every grooming appointment, in addition to descaling by your veterinarian. We brush your pet’s teeth using Nolvadent, a special antibacterial solution that also loosens and reduces plaque build-up. Teethbrushing, along with proper dental check-ups, will help keep your pet’s teeth clean and healthy.

PET DENTAL CHECK-UPS: Regular pet dental check ups are extremely important. More than 85% of dogs and cats over 4 years old suffer from periodontal disease, a condition in which bacteria attacks the soft gum tissue. Our highly trained staff will make note of any tartar buildup or gum irritations. We will also refer you to your veterinarian if further dental care is recommended.

MEDICATED SHAMPOOS: If your pet is suffering from seborrhea or flea bite dermatitis, we can recommend and apply a special medicated shampoo to alleviate the condition. Just ask us at grooming check-in!

INOCULATION REQUIREMENTS: All dogs are required to have vaccinations for Rabies, Distemper, Hepatitis, Leptospirosis, Para influenza and Parvo. All cats are required to have vaccinations for Rabies, Feline Distemper, Rhinotrachitis and Calici. Proof of vaccinations from your vet is required.
